Searches Center SIOOT/Multiossigen
coordinated by Prof. Marianno Franzini

**“How to counterbalance the physicist
and to delay the aging”**

PREMISE

The process of cellular aging enables with the birth, but the physical and metabolic signs are more evident after the 35 years. The aging involves the biological, physical and aesthetical state; it's a general purpose physiological trial that consists in a deceleration of the biological turnout. The hostile principal of the human health is due to the early aging of the cells caused by ectogenous (state of the water that we use, of the air that we breathe, professional and personal stress, sedentariness, viral seizures.) and endogenous (water and electric dysequilibrium, immunodeficiency, genetic predispositions) factors.

After years of study and experiences, within the oxygen-ozone therapy, the Multiossigen, working company in the treatments cure, has set the ANTIAGE PLANE, that foresees programs and treatments in comparisons of the process of aging and the relative pathologies.

The program has been conceived and envoy to stung by the Prof. Marianno Franzini, coordinator of the GROUP of Study on the themes of the aging, constituted from studios of the SIOOT (Scientific company of Oxygen and Ozone Therapy) and from the institute of Pharmacology of the University in Pavia.

EARLY AGING FACTORS

ENDOGENOUS FACTORS:

1 HYPOXEMIA OR NOT USE OF OXYGEN

A Hypoxemic state (what can have different sub-judices) causes in the cells of the mammals manifold damages, from the moment that the deficiency of a constant introduction of oxygen it's not compatible with the normal energetic outturn and, consequently, with the cellular survivorship.

2 WATER UNBALANCE

Of the circles intra/extra cellular and of the typesetting of the substance constituent the cellular lay-outs

3 ELECTRIC UNBALANCE

Of the lay-outs of cellular selective permeabilit

4 IMMUNODEFICIENCY

Smaller answer to the viral bodily assaults

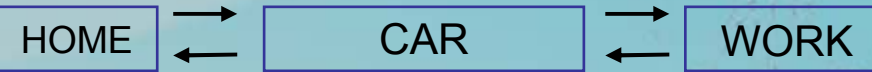

Metabolism Dysfunction

ECTOGENOUS FACTORS:

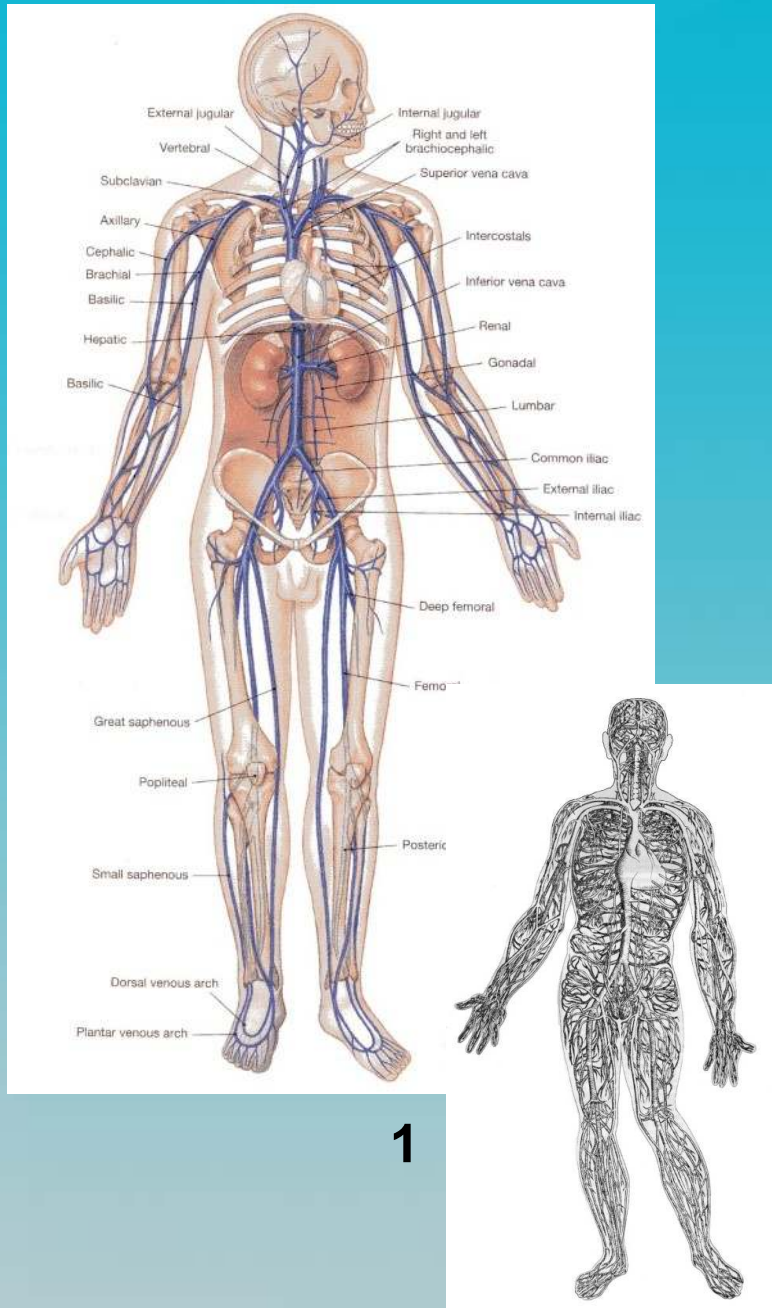

1 AMBIENT

Water that we use and air that we breathe

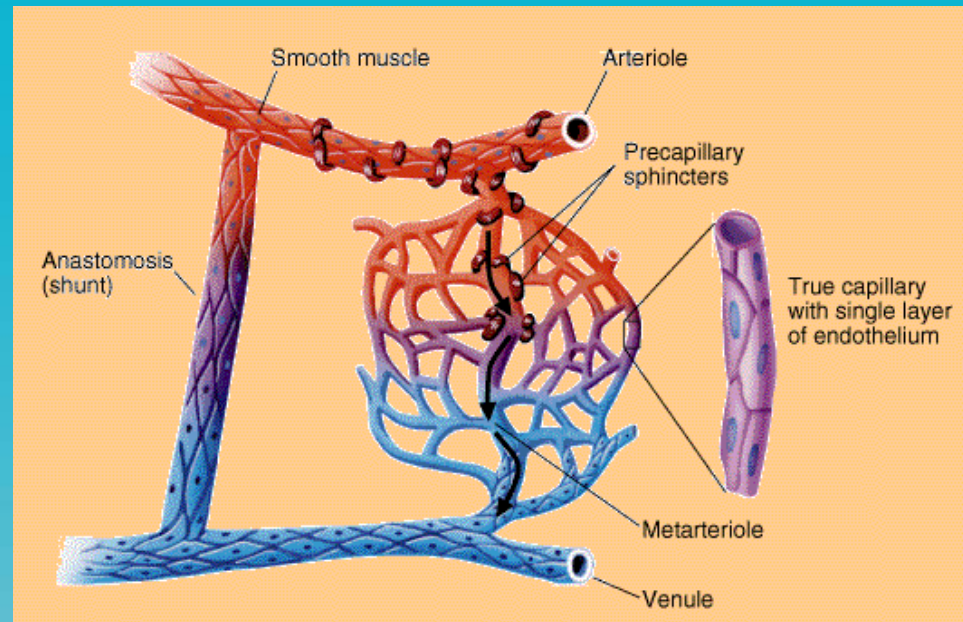

2 SEDENTARINESS

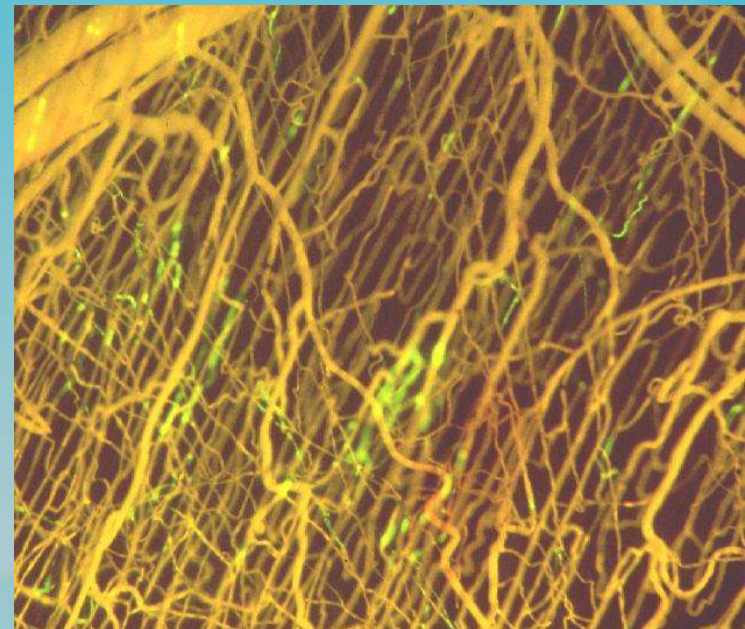

VENOUS MICROCIRCULATORY

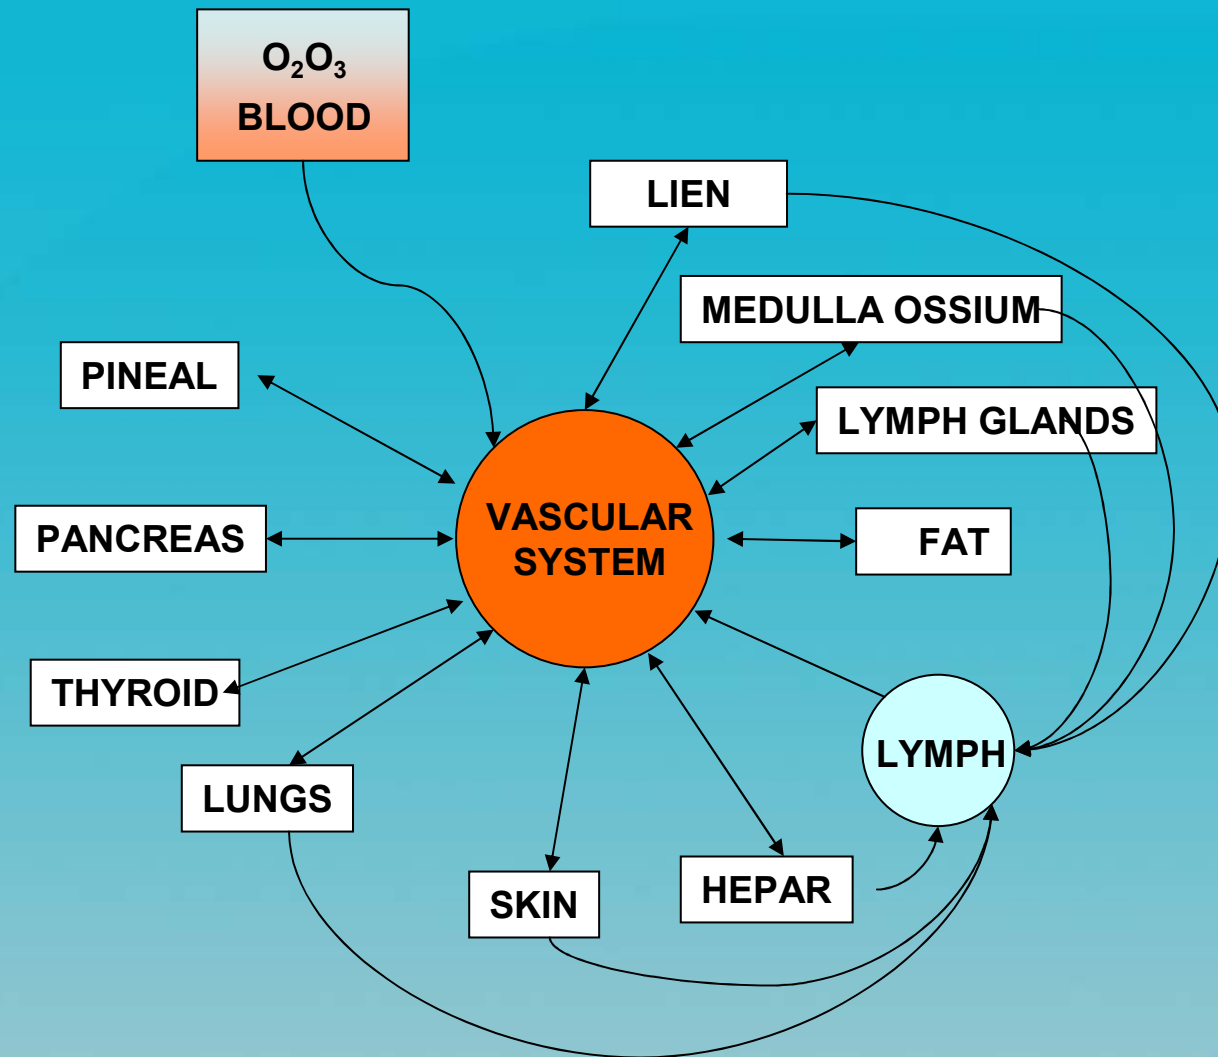

1

2

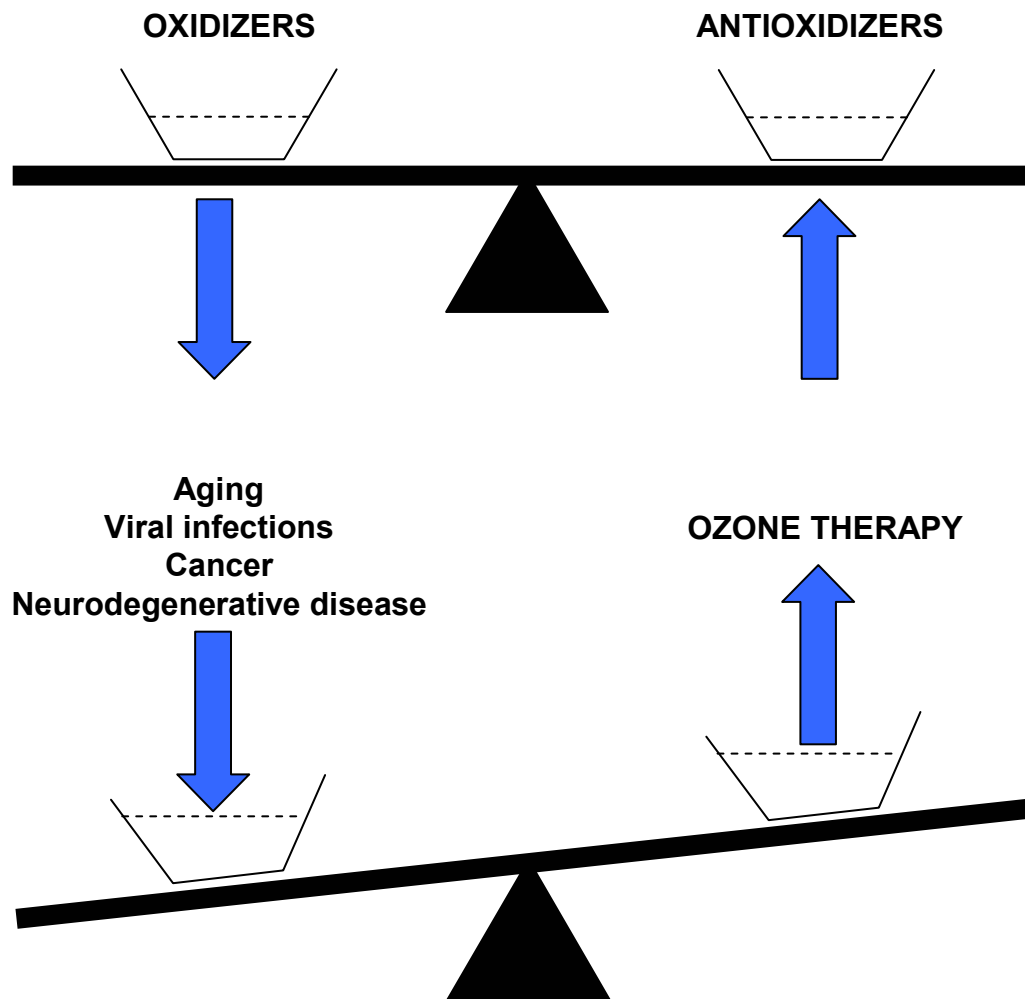

3

The scheme displays the drug-dynamics and the destiny of the ozonized blood when it reenters in the circulation: while the eritrocitis and the plaques remain in the vascular compartment, the LOPs and the leukocytes spread and migrate in the various organs

from BOCCI modified

The redox balance normal (aloft) and pathological (in low)

THE WORKS AREAS OF THE OXYGEN OZONE

The principal work areas of the physiology on which the treatment intends to operate are:

- the metabolic rebalance
- correction of the circulatory ischemies
- the rebalance of the correct availment of the oxygen from the human organization
- the rebalance of the bodily water
- the detoxification from the excess of toxins and radicals unlocks
- the reactivation of the circulation and the microcirculation
- the upsurge of the resistance to strain
- the immunomodulation
- the intervention on the antalgics problems
- the integrated action on the comfort and the general relax

Oxygen Ozone Therapy

- Metabolic rebalance**
- Good availment of the bodily oxygen**
- Correction of the circulatory ischemies**
- Rebalance of the bodily water**
- Detoxification from toxins and free radicals**
- Upsurge of the resistance to the strive**
- Antalgic action**
- Immunostimolant action**
- Treatment of the bacterial / viral infections also antibiotic resistant**
- Lipolitic action**

THE COADJUTANT TREATMENTS

The coadjutant treatments are companions to the sanitary treatments and fisiatric, as:

THE TREATMENTS OF BATHS OF OZONE

They are done with the system **OXYCELL** of the Multiossigen, system that foresees integral baths in a **hi concentration of ozone**.

In a special medical suit airtight, that cover the whole body, releas ozone to contact of the skin, enabling a process of revitalation, rejuvenation and improvement of the elasticity of the tissues.

THE COADJUTANT TREATMENTS

THE HYGIENIC PRODUCT FOR THE BODY CARE

OZOil: it's a milk for the body effective toward cellulitis, stretch marks, chilblains to the feet, prickles or cold intense to the feet, allergic rhinitis, vasomotorics or hypertrophics, heavy legs or swelling to the ankles from slow circulation venous - lymphatic.

OZOcream: it's a cream that fights the Herpes Zoster and Simplex; acne or pimply; wrinkles; aged skin or impurity of the skin; ulcerations, athlete's foot.

OZOdent: it's a dentifrice that brush deeply with bleaching effect, antitartar, anticaries and antiplaque, ideal in the gingival infections and post surgical operation.

OZOcap: it is a shampoo antifurrow that prevents the hairlosses.

OZOsoap: it is an liquid soap useful for a deepened and sweet cleaning of the skin.

MULTIOSSIGEN® S1-AB

**The accessorius that
makes you feel well to
your house**

*Disinfection and well-being in
in the waters of house,
SPA (wellness centers),
medical and dentistry studies*

**The water treated with the systems
Multioxygen® gives a quantity of
oxygen to the organization 40/80
times superior to the normal waters
to be drunk.**

The water treated with the
patented system S1-AB of
Multioxygen assures:

the disinfection absolute from
every charge bacterial and viral
of all the water that we use in
the house

and it favors

1. a best use of the bodily oxygen;
2. the bloody microcirculation;
3. the bodily metabolism;
4. the effectiveness of the alimentary diets
5. the respiratory tracts
6. the intestinal functions
7. the minus formation of the local fat (cellulitis)
8. recovery of the physical forcibleness

**The safety and
the health in
your glass**

OXYGENATE OZONE THERAPY

MULTIOSSIGEN

IN EVERY CITY

Applied to people with:

age >35 years

- Stress
- Depression
- Cerebral muscular restart
- << Neuromuscular resistance
- << Histic elasticity
- << O₂ peripheral use

Insufficiency:

- Circulatory arterial and venous
- Immunitary
- Respiratory
- Antalgic
- Dermatologyc
- Vascular impotence
- Results of bypass
- Recurrent viral / bacterial infections and / or resistant to the antibiotic therapy

THE PROGRAM STRUCTURE

The program of operation foresees:

- a pre check-up done with the special equipment MBC that notices:
 - the general state of the body
 - the presence of toxins and radicals unlocks
 - the defects of posture
 - the functional and metabolic state
 - possible diagnostic and instrumental examinations
- the valuation of the biological age
- the evidence of the critical states and the symptoms of aging
- the planning of operations, according to the indication of the medical team
- follow-up with contemplated check-up

THE MEDICAL SANITARY OPERATIONS

The personnel that operates inside the program antiage must have the followings specific competences:

1. knowledges of the therapeutic indications
2. possible side effects
3. tracts of administration
4. official therapeutic protocols SIOOT
5. certified technical endowments of the clinic of Oxygen Ozone Therapy
6. measures of emergency
